## **DETAILED ACTION**

### ***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species of the claimed invention: the species of Figures 1-1G, the species of Figures 2-2E, the species of Figures 3-3F, the species of Figures 4-4B, the species of Figures 5-5B, the species of Figures 6-6B, the species of Figures 7-7B, the species of Figure 8, and the species of Figure 9.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art Unit: 3761

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). This election is being mailed because Applicant set forth in the remarks of the last response that claim 1 was directed to the device of Figures 1-6 while claim 16 was directed to the device of Figures 7-9, yet claims 4-6 and 15 which were previously read on the species of Figures 7-9 depend from claim 1, i.e. where in Figures 1-6 is such structure supported? Also the certification in the 8-6-02 IDS is not the same as that set forth in MPEP 609, i.e. does not certify each item of information was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to filing of the statement.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. M. Reichle whose telephone number is (703) 308-2617. The Examiner's regular work schedule is Monday-Thursday.
